

The effect of the LPFM on my ability and freedom to listen to my preferred radio stations is upsetting. I listen particularly to K-LOVE which is sent to my home location via a local transmitter. Because this is an uplifting, both musically and spiritually, station, I would hate to think I would lose the ability to hear this station as opposed to some of the junk that is broadcast in these times. It just seems that when Federal (and State) intervention happens in our everyday lives, the average person loses. Please don't mess with our radio transmissions...PLEASE!!
